Duty3G

Installation & Quick Start Guide   Download Version

' *>*

Before Installing Duty3G

You will need
- Functional Software login ID and password
- Licence keys
- An existing COSmanager installation
- `root` shell
- Approx 5Mbytes disk space

Installing Duty3G

Download Duty3G
- Go to
  http://downloads.fs.com.au/main.php?PROD=DTY
- Select the desired operating system (OS) and version
- Right click DOWNLOAD RAW and save link to `/tmp` on your target host

Install Duty3G
- #   cos –u cosmos

- From the COSmanager button bar, navigate '*Config > COSmanager configuration > Applications*'
- Run '*Application > Install*'
- Press ▼ and choose Duty3G from the pull-down list
- If you did not receive a licence file with a Duty3G licence key, you will be requested to enter a licence key
- From the COSmanager button bar, '*Planet (File) > Exit All*'

Configuring Duty3G

- #   cos –u cosmos

- From the COSmanager button bar, navigate '*Config > Duty3G configuration*'
- Run '*Duty > Add*' to define a duty
- Duties can be defined as being:
  - *automatic* – recurring schedule with no user interaction
  - *scheduled* – recurring schedule requiring user interaction
  - *at-request* – ad-hoc

Running a Duty

- From the COSmanager button bar, click the '*Duty*' button
- Select the duty, and run '*Duty > Selected*'
